AquaControl +

Fill level measuring device and drinking water supply

Item-No.: 351021

8.Special functions:

8.1 Refilling:

8.1.1 Description:

Your device is equipped with an additional refilling function. This function enables water to be pumped of a secondary tank into the main tank.

The switching points “Refill ON” and “Refill OFF” may be adjusted per menu point in the usual way.

The additional pump must be fitted with its own separate device to prevent running dry.

8.1.2 Changes in the operation level:

The main menu level (see diagram 9) receives an additional menu point:

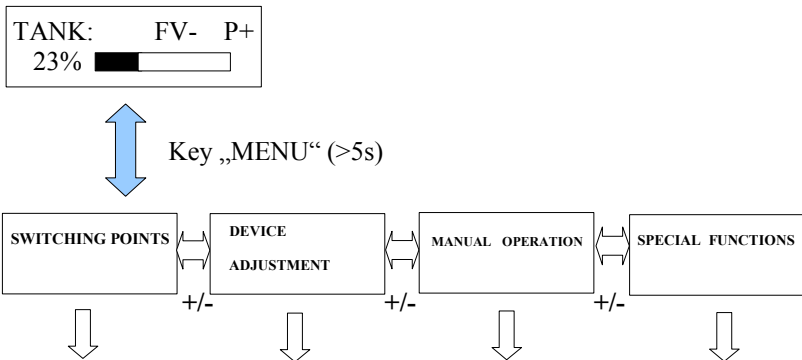

Diagram 14: Main menu level

The menu point “Refilling” has the following contents:
